## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on March 2, 2005 has been entered.

This Office action is in response to the IDS statement filed March 2, 2005.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-11 and 14-33 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for nitrates as the inorganic ester, does not reasonably provide enablement for all inorganic ester type radical that contain oxygen, such as -NO, -PO<sub>x</sub> and SO<sub>x</sub>. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

While the specification supports nitrates as the inorganic ester it does not support any other inorganic ester functional group. See page 8, lines 25-30; page 13, line 9; page 15, line 5; page 19, lines 14-21.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-11 and 14-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are rejected because the members of the alternative group are indefinite. The species of at least one is a C<sub>4</sub> to C<sub>13</sub> ketone is a compound and not a functional group. Clarification and correction are required.

Claim 7 is rejected because it is not clear what is meant by the terms "sparsely branched." The term "sparsely" is a relative term that does not have a comparative value.
